

Research The Need

QUIZ

Question 1

The IET Circuits Devices and Systems Journal could be considered a highly credible source of information.

- a. True
- b. False

Question 2

Which of the following questions should be answered in establishing the relevance of an engineering problem, before proceeding to developing designs to solve the problem?

- a. What is the cost of the product?
- b. Are other successful products already developed to solve this or a similar problem?
- c. Is there a critical need for a company to make a profit from this type of design/product?
- d. Is there compelling evidence that solving the problem will address a major global issue?

Question 3

The World Wide Web is rarely a good place to begin gathering information to justify the need to solve a problem.

- a. True
- b. False

Question 4

Information gathered from the company InvenSense on MEMs based devices would be convincing and credible on its own, to support a new MEMs design or product.

- a. True
- b. False

Question 5

Articles taken from the proceedings of the SSSI Tasmanian Regional Conference would have high credibility with an audience outside of engineering.

- a. True
- b. False
