

Design innovative MEMS

Bosch is a leading player in the field of MEMS products and technologies. For our Research and Technology Center in Palo Alto, CA, we are seeking a post-doc for MEMS design and characterization.

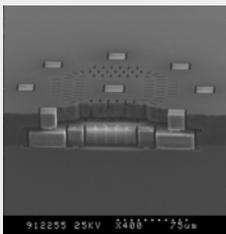

Responsibilities:

- Help develop the future MEMS vision of Bosch.
- Assess MEMS technologies and devices for future Bosch products.
- Design, simulate, and characterize MEMS prototypes.
- Interact with corporate and academic R&D partners in the US and Europe.

Requirements:

- Recent PhD in EE, ME, Physics, or other relevant field.
- Broad experience in MEMS engineering (design, fabrication, characterization, and packaging).
- Knowledge of finite element simulation tools.
- Self-motivated & independent working approach. Excellent communication and team skills.
